- Menstrie House Care home car park - FK11 7BT
- The Charrier - FK11 7BZ
- Brook Street - FK11 7AA
- Garage number 6 near the street Forthvale - FK11 7AT

ACTIVATING AND DISPOSAL OF SYNTHETIC FLOOD PROTECTION

Water activates the synthetic flood protection sacks and snakes. Remove them from their packaging and soak them with water via the buckets supplied (or place them in a bath or toilet). The items can be extremely heavy when fully activated. For your own safety never attempt to activate the device in a flooded watercourse. Once activated place the item against or around the area that is needed to be protected as a barrier to water.

Hydro Snake - <https://www.youtube.com/watch?v=ncq58jAOKrg>

FloodSax - <https://www.youtube.com/watch?v=F7tlb4D0XLw>

Deploying Sandbags - <https://www.youtube.com/watch?v=-T--l3b-34>

Disposal of synthetic flood protection item is detailed on the packaging for each device type. In the main they are safe to dispose of with the general waste service.
